

SwingLift ML500LB

Van Type

Manual slew

ML500 stowed position

1.5m manual boom extension

The ML500LB is a demountable 500kg Swing Lift for lifting goods into vans. Its extra boom reach and heavy duty winch make it the perfect tool for cost-effective below ground handling for the utility and construction industries.

FEATURES

- Lifts 500kg in all configurations of boom position
- Low crane weight of approximately 86kg
- Easy to use wander lead remote control
- Demountable
- Built in overload protection
- Compact design folds away when not in use
- Manual boom extension with three height settings

OPTIONS

- Down-rated versions available
- 12v or 24v operation from vehicle battery
- Radio remote control
- Extra rope length - 12m/40'
- Manual stabiliser legs
- Stabiliser/outrigger pads
- Battery protection
- Lifting accessory kit
- Cranked hinge for even greater flexibility
- Snatch block kit - allows loads to be centrally positioned within the van
- Powder coated paint finish

Please note that nearside and offside fittings require a different crane, pillar & fitting kit. It is not always possible to raise the crane boom to its highest position inside a van.

Snatch block kit
